I, Shawna Peachey, of Peachy Poodles do state that all puppies sold by me have a health guarantee against genetic defects for 12 months from the date of birth. If your puppy dies from a hereditary disease, we will refund you the full price of your puppy. This must be proven by a written statement from a licensed veterinarian and must state the puppy died from a congenital defect. No exceptions. We need all vet records as well. If this is proven, a refund for the price of the puppy will be granted. Refunds will not include shipping costs or veterinarian costs or the non-refundable deposits. This does not apply to puppies who are genetic carriers of a disease, but rather be affected by sudden death by having a genetic disease. This does not cover viral (such as Parvo), bacterial diseases (such as kennel cough), or any hip, patella problems.

All puppies come with a veterinarian check, the first 4- in- one puppy vaccine, and two deworming. You may take your puppy to a vet at your cost within 3 days of receiving him/her and get an exam to ensure good health.

A booster vaccine is needed 3-4 weeks after the first vaccine received from us.

Rabies can be given at 3 months of age.

A spay or neuter is required by 12 months of age. Any unaltered puppy voids guarantee, unless breeding rights purchased.

Trupanion Insurance is mandatory for the first 30 days. It's free and you must sign up within 24 hours of receiving the puppy.

Puppies are weaned before departure and will be eating soft canned and kibble Science Diet Puppy Chow.

We do not guarantee size or shedding for our puppies.

If you are unable to care for your puppy, please contact us, we will help. No questions asked, we can assist in placing them in a good place.

Please keep this paper.

Thank you and enjoy your new puppy!

Shawna Peachey
